

DEAR PARENTS,

We know that summer break can be a challenge for families living with Fetal Alcohol Spectrum Disorder, so we've created a camp that supports the kids and helps the parents to relax, knowing that their children are in good hands. Our trained professionals have the skills, experience and expertise to provide a specialized camp that is safe, therapeutic and fun.

The camp provides opportunities for indoor and outdoor play, creativity, and skill development. Social interaction and quiet time will be a part of each day so that your child feels understood, supported, respected and engaged.

Lunch and two nutritious snacks will also be provided at the camp.

We look forward to spending time with your child this summer. Please feel free to contact us with any questions you may have.

Sincerely,

Lesley Barraball

Director of Children's Mental Health
Carizon Family and Community Services

Inspiring Hope + Wellness in Our Community
